RE: ANTJE BRUCHNER

I have the pleasure of briefly recording my working experiences with Antje on paper.

We worked extensively together at NERA on physically assessing healthcare facilities in Cairo, Tunis, Durban, Nairobi, and Casablanca for the purposes of acquisition by private equity investors.

Antje's attention to detail, meticulous recording of data and observations, evaluation and report writing struck me. Antje has a unique ability and orientation for detail and analytical workstreams.

I can only but recommend her and would any day be on a team with her again.

Regards
